

Gate Safe Aware Installer Code of Conduct

As a Gate Safe Aware Installer, you will be expected to:

- ✓ Encourage and demonstrate good practice within the gate automation industry
- ✓ Educate your customers on the importance of automated gate safety
- ✓ Adhere to the safety protocol for automated gates (and barriers) as defined in the Gate Safe / DHF guidelines
- ✓ Provide the appropriate recommended products and services that will deliver a safe automated gate / barrier installation
- ✓ Actively follow up all installations with the necessary maintenance regime as recommended by Gate Safe
- ✓ Undertake risk assessments prior and post the commissioning of any installation and subsequent to any follow up visits
- ✓ Instill in customers the importance of working with a qualified electrician with three years experience, to make the final electrical connection to the mains supply
- ✓ Avoid any professional association with a non compliant installation
- ✓ Promote the importance of working with Gate Safe Aware installers to prevent any further accidents occurring
- ✓ Act professionally at all times and do nothing to bring the Gate Safe name into disrepute
